

LINK LOAN

Link provides a structured path to homeownership for consumers who may not qualify for traditional mortgages. It expands access to home financing by providing a 40-year seller financing contract, with the ability to obtain equitable title, offering consumers long-term, permanent financing. It allows your real estate agent partners to close their sale immediately as part of the process. We expect this product to do a significant volume, as it can tap into a substantial market of underbanked or otherwise underserved consumers including those that lack the 15-20% down typically needed. The typical downpayment for this product is 3.5%.
